Our Logistics Services

The temporary storage period for imported goods has been reorganized in accordance with Article 46/2 of the Customs Law, which has resulted in negative consequences for some companies.

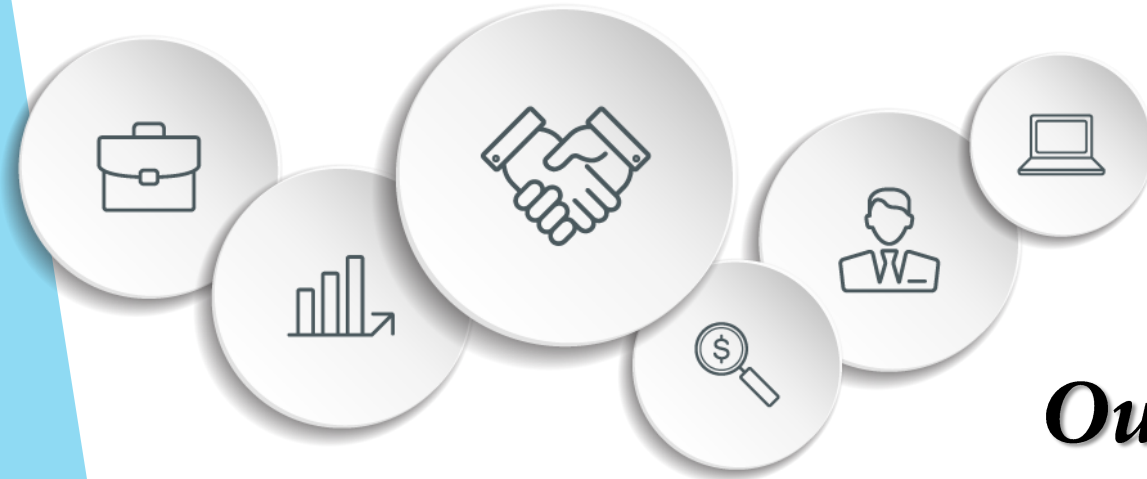

To mitigate these issues and considering economic advantages, our company aims to offer you the most suitable warehousing service by evaluating various alternatives.

Our Bonded Warehouse Services

As is known, for goods arriving under E, F, C, and D delivery terms, it is necessary to declare an insurance policy to the customs where the import will be made. If an insurance policy has not been taken out, 3% of the value of the goods is added to the tax base as a comparable insurance value. This increase in the tax base affects both customs duties and VAT amounts.

Therefore, in addition to consultancy services, our company also provides insurance services on behalf of Zurich Insurance Group to minimize your company's expenses and prevent time loss. In addition to transport insurance, we offer mandatory traffic insurance, personal accident insurance, health insurance, comprehensive coverage, and other insurance services to our customers.

Our Insurance Services

The most important stage of foreign trade is the consultancy activities before and after import and export. Providing accurate, timely, and reliable information to you, sharing this information mutually, conducting feasibility studies for the goods you will import and export, solving problems, generating ideas, developing suggestions, obtaining permissions before import and export, and completing your transactions in a smooth, trouble-free, and fast manner by foreseeing all problems in advance is our job. Identifying, planning, executing, finalizing, and providing high-quality consultancy services for the documents that will create added value according to the needs of your company is our expertise.
